

Internship Opportunity

Assistant Medical Writer / Stagiaire concepteur rédacteur médical

Havas Health & You
Puteaux, France

Havas Health & You is a global healthcare communications group - with several offices worldwide, including the Paris region.

We are looking for an Assistant Medical Writer to join either our French Medical Writing team or our Global Medical Writing team! This role would be ideal for someone seeking to pursue a career in medical communications.

We are looking for someone with a Life Sciences background who wants to use their degree in a creative way. Here at Havas Health & You Paris, we connect healthcare professionals and patients with the knowledge, tools and services they need to better achieve their goals. You can expect to get involved in producing high-quality medical education and communication materials for the pharmaceutical industry and other healthcare bodies.

As part of your role, you will research, write, edit and proofread copy to the highest standard. By working alongside Senior Medical Writers in either the Global or French team and liaising with our internal teams, you will develop your writing style and learn to create engaging content for the different platforms produced at Havas. For instance, you can expect to see your copy used on platforms such as websites, mobile applications and in print form. Here at Havas Health & You, you will be able to use your passion for science and work across a variety of different therapeutic areas, utilizing the research skills you have acquired during your studies.

We place a great deal of focus on the development of our people, supporting them and providing ample opportunity to advance.

The skills and experience required are:

- Scientific or Life Science background (working towards a Masters, PharmD or PhD)
- Native English Speaker (or 100% fluent) or Native French speaker depending on team
- Team player with a problem-solving mindset
- High analytical and writing skills to create engaging content
- Creative mindset with an ability to work/liaise with different profiles (creatives, accounts, medical, legal, etc.)
- High level of attention to detail / proofreading content and making sure all changes have been implemented
- Digitally savvy
- Strong organizational, time management and communication skills
- Experience doing literature research and working with PubMed, science direct or other online libraries of scientific literature.

Contract: Internship – Professional Internship

Remuneration: Yes

Internship duration: 3 months - 6 months / 'Contract Alternance' accepted
